DID YOU KNOW?

...that ACI marina Žut is an **indispensable nautical station** to all who visit the Kornati. It is s situated in the westernmost part of the harbor of Žut, in the northwest part of the Kornati Archipelago, just outside of the borders of the Kornati National Park.

...that in **strong bora winds**, it is recommended to berth on the marina's north pier and at buoys, whereas in strong jugo winds it is much more pleasant to berth on the south pier. Boats with a draft of more than 3 meters can berth anywhere on the south pier or at the very end of the north pier.

...that Žut is an **uninhabited island** in the Croatian part of the Adriatic Sea, in central Dalmatia. With an area of 14.83 km² it is the second largest island in the Kornati archipelago, after Kornat.

DID YOU KNOW?

...that the island of Piškera is an **uninhabited island** whose surface covers only 2.66 square kilometers, and its highest point is 127 meters above sea level. ACI's marina is the only outpost of civilization disrupting the pristine nature of the island, surrounded by a mosaic of islands and islets, rocks and lighthouses.

...that George Bernard Shaw wrote: "On the last day of Creation, God desired to crown His world, and thus created the Kornati **islands out of tears, stars and breath.**" According to the legend Shaw referred to, the Kornati were made from a handful of white stones which God had left over after creating the world, so He scattered them around and decided that nothing more needed to be changed here.

...the first written record of **fishing in Croatia** dates back to the end of the 10th century, when the new arrivals mixed with the population of Byzantine Dalmatia, transferred to the control of Croatian rulers.

DID YOU KNOW?

...that Jezera is home to many authentic customs, such as the Jezera **Sailors' Ball**, held from the late 19th century until the 1950s whenever a young sailor was embarking on his first voyage, or Preperuše, the tradition of children invoking rain in times of drought.

...that out of the **seven waterfalls in Krka National Park** the Roški waterfall is the widest, and Skradinski buk the largest and most famous. Roški is surrounded by tall canyon cliffs covered in dense vegetation, and its beauty is only surpassed by that of Skradinski buk, flowing over seventeen terraces stretching for more than 800 meter.

...that the surroundings of Skradin conceal countless gems that are all inaccessible to car drivers. Three **cycling paths** lead to the most famous sights: the first brings you to a remarkable combination of history and nature that is Bribirska glavica, the second takes you to the magnificent cascades of the Skradinski buk waterfall, and the third leads to the gentle coves of Lake Prokljan.

...that the town of Vodice ("waters") owes its name to the **wells which never run dry**, not even during the hottest days in summer. The locals traded water to islanders until the 19th century, as testified by the two wells which still stand in the town square.

...that there are many **historical sites and archeological sites**, prehistoric fort Prižba, the Illyrian-Roman fresh water Rimska ogradenica, Illyrian, later roman town of Arauzona etc. around Vodice.

...that Surrounded by sea and the Kornati National Park from one side and the Krka National Park from the other, Vodice lures everyone who yearns for an **active vacation, fun and enjoyment**: merry and vivacious in the day, charming and magical during sundown, glamorous and sparkling in the night life, which can last up to early hours of the morning...
